an-vision

Thank you for choosing An-Vision for your cataract surgery needs. To best support your surgical workflow, your choice of injector is included in the purchase of each intraocular lens (IOL).

We are pleased to offer two high-quality Swiss-made injector options from Medicel:

- **Accuject (Blue)** – One-piece (loading cartridge attached to the injector)

- **Viscoject (Green)** – Loading cartridge comes separate from the injector with an included loading block. IOL is loaded in the cartridge, then the cartridge is placed inside the injector.

Please let us know your preferred injector when placing your orders.
