The best solution for every Veterinary Ophthalmologist

Surgery

The controlled, save and non bleeding usage in smallest space creates best pre-condition for a precise and tissue saving working in the oprating room and makes the diode laser to an essential element in any modern practice or clinic.

Pain Therapy

Wheter for chronical and acute inflammatory diseases of the musculoskeletal system or for physical therapy use: the "hard laser" with his long wave light means short irradiation times and a high penetration into tissues or joints - an ideal combination

Wound healing & tissue repair

Whether in dermatologic use, wound healing deficits, hot spots, ALD, claw diseases, and much more... with its anti-inflammatory and bactericidal effect the diode laser supports regeneration and proliferation of cells, tissues and ATP-reserves evidently!

Vet-Dentistry

Soft tissue surgery, reduction of germs and bacteria, supporting at FCGS (stomatitis), PTT with EmunDo

PTT-Photo Thermal Therapy with EmunDo

Effective in combating pathogenic germs & bacteria, perfect for wound care & for oral medical use. For oral medical use as well as IMMK, SCC...

Equine

Transendoscopic use (e.g. upper respiratory tract), tumorexcisions (e.g. equine sarcoids), ophthalmic treatment (e.g. IMMK, SCC), irradion of wounds and physical therapy use.

Endoscopy

Save working anywhere. Simply insert the fiber into the working canal of your endoscope (e.g. ectopic ureter, cystoscopy, LATE)

Exotics

Birds, reptiles, amphibians, fish (e.g. koi carp)
